Current rules for travel to/from Italy….

Travelling to Italy..

Demonstrating your COVID-19 status.

Italy will accept the UK's proof of COVID-19 recovery and vaccination record as the equivalent to a green pass. If you are travelling with a printed PDF proof of vaccination status, it must date from 1 November 2021 to ensure that the certificate can be scanned successfully. Your NHS appointment card from vaccination centres is not designed to be used as proof of vaccination and should not be used to demonstrate your vaccine status.

Regardless of your vaccination status (see below) anyone arriving in Italy by air, land or by sea may be subject to random COVID testing on arrival until 31 January.

If you can demonstrate that you are fully vaccinated.

If you travel from the UK and can demonstrate that you are fully vaccinated, you can enter Italy without needing to self-isolate. In addition:

- you must fill in the passenger locator form (EU PLF) before you enter Italy to get a QR code to show to your travel provider and Border Police. You can ask for paper form if you do not have an electronic device
- you must show evidence of a negative PCR test taken within 48 hours before entering Italy OR a negative antigen test taken within 24 hours before entering Italy.

Returning to England..

Before you travel to England you must:

- take a COVID-19 test – to be taken in the 2 days before you travel to England
- book and pay for a COVID-19 PCR test – to be taken after you arrive in England
- complete a passenger locator form – to be completed in the 48 hours before you arrive in England.

When you arrive in England.

After you arrive in England you must take a COVID-19 PCR test. This is the test that you booked before travel.

You can take the test any time after you arrive and before the end of day 2 at the latest. The day you arrive is day 0.

You must quarantine in your home or the place you are staying while you await your test result.
